They order approx. #15 x 10ml TA40 and some 10ml 10% sodium chloride but only give very few names. We are going to be cleaning up all of these ridiculous accounts over next month or two.
If 10ml MDV then we need one patient name per vial…..anything else does not make sense=not logical. They are hand writing? Explain that they can print any patient roster= must be an "in –good faith" deal……
